# Developing a Next-generation Ocean Carbon and Acidification Data System Portal

Patrick Foley
Mentor: Liqing Jiang

cisess
Cooperative Institute for Satellite Earth System Studies

## Objectives

- Create an enhanced portal for the Ocean Carbon and Acidification Data System with new features
- Integrate the new NOAA OneStop Search API

## Results

- Created an easy-to-use interface for selecting different search parameters
- Displayed detailed information about ship tracks
- Implemented an improved spatial search function
