

Multidisciplinary social science research methods to conduct novel, actionable research focused on climate decision support, user understandability and needs, and indicators.

National Climate Indicators System

A system of physical, ecological, and societal indicators that communicates and informs decisions about key aspects of climate changes, impacts, vulnerabilities, and preparedness.

- Provide meaningful, authoritative climate-relevant measures about the status, rates, and trends of key physical, ecological, and societal variables and values;
- Inform decisions at multiple scales
- Identify climate-related conditions and impacts
- Provide analytical tools by which user communities can derive their own indicators for particular purposes.

Categories of Indicators: Framework for the National Climate Assessment Indicator System

Multidisciplinary social science research methods to conduct novel, actionable research focused on climate decision support, user understandability and needs, and indicators.
